

## Safety Systems

# SmartVu Digital Rear Mirror.

For unobstructed view of the road behind, helping to eliminate blind spots.

A rear-facing camera is seamlessly mounted on the rear of your vehicle, capturing a wide-angle, high-definition view of the road behind. This live video feed is transmitted directly to your digital mirror display, replacing the traditional mirror reflection with a crystal-clear, real-time image.

Whether your view is blocked by passengers, cargo, or headrests, this system helps to ensure you always have an unobstructed view of the road behind, dramatically improving visibility and overall driving confidence, especially in larger vehicles or low-light conditions.

9.66" display for clear and easy viewing

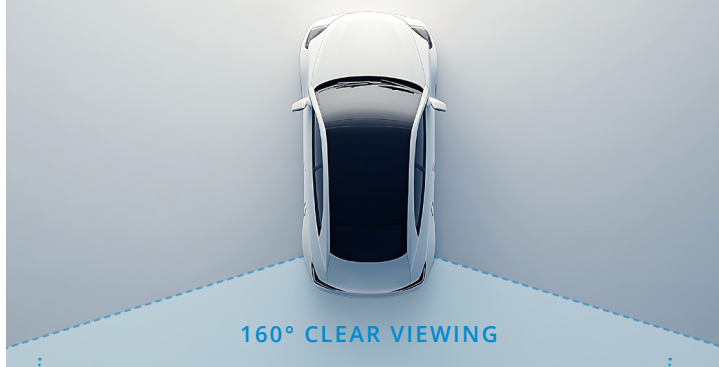

Discreet rear facing camera for seamless integration

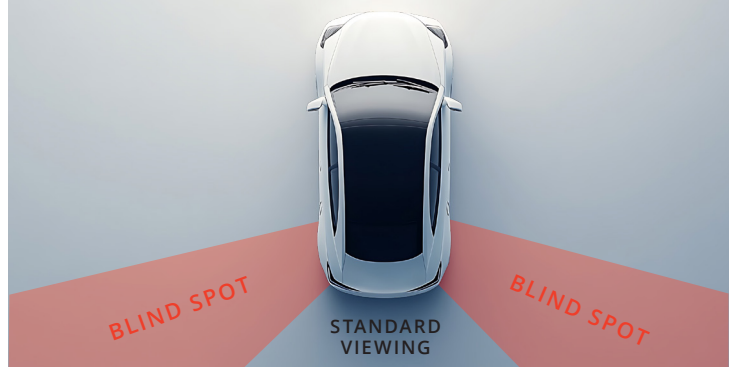

### KEY FEATURES

- **Vivid 9.66" display:** The large, high-resolution touchscreen adjusts to lighting conditions for optimal visibility, whether in bright sunlight or at night.
- **Increase visibility:** With a 160° ultra-wide field of view, this camera captures more of your surroundings, covering those hard-to-see areas for safer lane changes and manoeuvres.
- **Professional installation:** Fitted by a trained professional technician, ensuring a perfect setup for maximum performance and safety.
- **Touchscreen control:** Quickly access settings and features with a user-friendly interface, making operation simple and intuitive while driving.
- **Crystal clear night vision:** The Wide Dynamic Range (WDR) camera enhances low-light performance, so you get sharper, more detailed footage day or night, even in low-light conditions.
